

Space Safety Engineering Journal: Editor-in-Chief

Duties of Editor-in-Chief

The Editor-in-Chief has the responsibility for the oversight of the scientific and technical quality and scope of the journal, for the day-to-day operations as well as for operational policies implementation and management facets. These include, but are not limited to, directing the timely solicitation and selection of papers, evaluation by Field Editors, and editing. The Editor-in-Chief shall always strive to maintain an adequate balance between journal's topics editorial coverage, in line with IAASS overall research and engineering areas of interests. The Editor-in-Chief will have a broad vision for the future in terms of the direction in which he/she would like to take the journal.

The Editor-in-Chief reports to the IAASS President. He/she should work with the IAASS Executive Committee and with journal's Field Editors to establish general editorial guidelines and policies subject to approval of the IAASS Board.

The Editor-in-Chief shall serve as the chair of the journal's Editorial (advisory) Board. Appointments of Editorial Board members, for a fix but renewable period of time, are at his/her discretion but subject to agreement of the IAASS Board.

The Editor-in-Chief is responsible for the appointment and supervision of other editors, including Field Editors and Managing Editor. New Field Editor positions may not be created without the approval of the IAASS Board.

The JSSE Editor-in-Chief is a nonvoting member of the IAASS Board. At meetings of the IAASS Board he/she will present a progress report on the journal, and recommend any relevant action which is subject to IAASS Board approval.
