

Space Safety Engineering Journal: Editorial Board

Editorial Board membership

An appropriate balance of suitably qualified members from academy, industry and agency shall constitute the Editorial (advisory) Board of the journal. The Editorial Board membership will also represent a weighted mix of specialists reflecting the journal's editorial coverage and fields of interest.

The appointment of Editorial Board members is made for a fixed but renewable period of time. This is a voluntary position, and there is no remuneration related to the post. The Editor-in-Chief serves as the chair of the Editorial Board.

Editorial Board duties

The role of the Editorial Board is to advise and support the Editor-in-Chief, who has the responsibility for the content of the Journal, in the development and good management of the journal. They will be consulted regularly (at least one per year) to gauge their opinions about the running of the journal, inform them of any change to journal policies, and identify future challenges.

Editorial Board members should consider the journal as the first choice for publication of their own papers and editorials on relevant topics. They would provide support in suggesting subject matter, seeking best potential authors, and actively encouraging submissions of abstracts by colleagues.

The Editorial Board members will act as ambassadors for the journal in their organizations. They should help promote the journal to potential readers and subscribers. They should help to ensure that the journal is well used by local faculty and organizations, and that (free) subscriptions are held by local libraries.

On a regular basis, Editorial Board members may be invited to write editorials on special topics, support the organization of monothematic issues, and act as reviewers of papers submitted to the journal.
